Industrial AI & Developer Ecosystem Leader | Manufacturing AI, GenAI & Edge AI

AI strategy and industrial technology leader with 12+ years of experience in manufacturing software, IoT products, data platforms, GenAI, and enterprise AI adoption. I help industrial organizations turn AI opportunities into practical roadmaps, scalable platforms, developer enablement, and measurable adoption. My background combines software product delivery, ecosystem building, and AI governance.

Work Experience

AI Strategy Lead & AI Compliance Officer 12/2025 – Present
Bosch Mobility Electronics, Reutlingen, Germany

- Own the AI strategy agenda for Bosch Mobility Electronics, including priorities, governance, portfolio direction, and quarterly management cadence across a 40,000-employee organization
- Orchestrate rollout of 20+ AI solutions, including agentic AI tooling enabled for 1,600 software developers
- Lead an active internal AI developer community, enabling adoption, feedback loops and best-practice sharing
- Represent Bosch Mobility Electronics in the Bosch Mobility AI Hub, shaping portfolio priorities and helping three strategic use cases secure central financing
- Lead AI governance and compliance strategy for a 2,000 application IT landscape, enabling scalable and responsible AI deployment

Engineering Manager Data-Centric Software 07/2021 – 11/2025
Software Campus at Bosch, Kusterdingen, Germany

- Built and scaled a 30+ engineer AI and data platform organization across Europe and India
- Led AI and data platform strategy with €3M annual investment, enabling data-driven products and GenAI capabilities
- Secured €1M+ additional funding and established evaluation frameworks for GenAI use cases moving from innovation to production

Data Architect and Project Lead Data-Centric Software 01/2021 – 06/2021
ME Software Campus at Bosch, Kusterdingen, Germany

- Initiated the Data-Centric Software Program and defined early architecture for industrial software and AI use cases

Technical Project Manager AIoT 03/2018 – 12/2020
ME Software Campus at Bosch, Kusterdingen, Germany

- Led Bosch Intelligent Vibration Analysis Sensor, Bosch's first product running an on-device CNN using TensorFlow Lite for Microcontrollers on ARM Cortex-M7
- Led software development and operations for Bosch Parking Lot Sensor and Bosch Sense Connect Detect with distributed teams in Germany, Bulgaria, and India
- Developed and released the IoT software development process for Bosch Mobility Electronics, used by 20+ IoT projects at the Software Campus

Software Product Owner TDL 05/2015 – 02/2018
EuroEngineering & Bosch Connected Devices and Solutions, Reutlingen, Germany

- Led Bosch Transport Data Logger from concept to market release, covering embedded software, algorithms, mobile apps, cybersecurity, and distributed delivery with 35 engineers

Founder and Product Owner 11/2014 – 09/2015
Looming Technologies, Böblingen, Germany
- Founded a startup building mobile apps for student NGOs, delivering 18 apps used by 2,000+ users

Embedded Software Engineer 01/2014 – 05/2015
Omron Corporation, Nufringen, Germany
- Developed proof-of-concepts and reference designs for IO-Link integration in industrial automation products

Channel Model Intern 09/2012 – 09/2013
Intel Corporation, Aalborg, Denmark
- Developed MIMO OTA measurement method for cellular modem validation

Education

University of Aalborg Aalborg, Denmark 2013
Master of Science in Wireless Communication Systems

University of Oviedo Oviedo, Spain 2013
Telecommunications Engineering (equivalent to Bachelor and Master of Science)

Ecosystem & Thought Leadership

- Founder of GenAI Gurus, ~3,000 member AI community connecting practitioners, startups, researchers, and enterprise AI leaders across Europe
- Active contributor to Agent Governance Toolkit and AgenTrust, focused on governance patterns for embodied AI, robotics and physical AI systems
- Host and organizer of technical AI talks, creating bridges between AI researchers, enterprise practitioners, startups, and applied engineering communities
- Founder of TinyML Germany, developer community focused on embedded and edge AI topics, 2019-2024
- Lecturer in Generative AI at IEBS Digital School, 2024-2025
- Technical Reviewer, TinyML Cookbook, 2nd Edition, Packt Publishing
- AWS Community Builder in Machine Learning, 2021-2024
- Mentor at DeepLearning.AI, 2021-2025 and The Mentoring Club, with 50+ mentoring sessions

Certifications and achievements

- BlueDot AI Governance and AI Alignment
- TOGAF Enterprise Architecture Practitioner
- PMP (Project Management Professional)
- Cloud certifications across Azure, AWS and Oracle Cloud, including Azure AI Engineer, Azure Solutions Architect and AWS Solutions Architect
- Granted patent (WO2017EP70617)

Languages: English fluent, German fluent, Spanish native

Core capabilities: Industrial AI adoption, developer ecosystem building, AI platform strategy, GenAI and RAG, Edge AI, AI portfolio management, technical stakeholder enablement, manufacturing software, IoT products, data platforms, AI governance, product roadmap influence, technical storytelling, developer enablement, partner engagement
